

## **Downloading Overdrive Media Console & Setting up Audio Devices**

1. Log onto the [eIndiana/Overdrive](#) site from the [North Webster Library](#) home page using your card and pin number/password.
2. Click the 'Quickstart' guide on the left-side of the screen. Scroll down and click '[Download and Install Overdrive Media Console.](#)'
3. Scroll down and check the settings for your computer—Windows/Mac, Mobile; Android/Black Berry/iPhone/iPad/Windows Mobile. (At this time if you don't have iTunes or Windows Media Player you'll need to download the software for both. The links for iTunes and WMP should be on the page and available for download.) Once both programs are installed on your computer you can then click the 'Download' button beneath 'Mobile Selections' to install the Overdrive Media Console.
4. From your desktop shortcut open '[Overdrive Media Console](#)'. Then connect your audio device to the computer.
5. Go back to [eIndiana Digital Consortium/Overdrive](#) website and find an audio book that your device will support. (Beneath each title there will be a list of what formats each book is available in.)
6. Click 'Place in Cart' and proceed to 'Checkout'. Select the number of days you prefer, (7 or 14), and click 'Download'. Select all the parts to download to your PC/Overdrive Media Console.
7. The Audio Book will appear in the Overdrive Media Console after it's downloaded. Click 'Transfer' on the top toolbar and the 'Transfer Wizard' will appear. From here you can select as few or as many parts as you wish at one time. (Each part is between 60-70 minutes of listening time.)
8. Click 'Next' and the transfer wizard will transfer the parts to your audio device.
9. Click 'Finish'.
10. Disconnect your audio device from the computer. Now you should be able to find and listen to your newly borrowed audio book!
